Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 49 and 50 are rejected under 35 U.S.C. 102(b) as being anticipated by Hanes (3029872).

Hanes discloses a multi-part plunger assembly comprising a plunger sleeve 53 having an open end and a mechanical coupler or ball 65 sized for retention by the sleeve to releasably secure and functioning to mate with the top of plug 2.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 23 and 29 are rejected under 35 U.S.C. 102(e) as being anticipated by Billingsley (6935427).

Billingsley discloses two separable, independently movable sections 26, 50; the sections continuously and mechanically latched, at 52, to move in unison (and still function as a plunger) and prevent accidental separation; and the latch disengageable at the surface (to use the plunger 26 again).

Allowable Subject Matter

Claim 31 is allowable. Claims 31-36 and 39, previously withdrawn from consideration as a result of a restriction requirement, require all the limitations of an allowable claim. Pursuant to the procedures set forth in MPEP § 821.04(a), **the restriction requirement between inventions species, as set forth in the Office action mailed on 12 July 2006, is hereby withdrawn** and claims 31-36 and 39 hereby rejoined and fully examined for patentability under 37 CFR 1.104. In view of the withdrawal of the restriction requirement, applicant(s) are advised that if any claim presented in a continuation or divisional application is anticipated by, or includes all the limitations of, a claim that is allowable in the present application, such claim may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Once the restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 443 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

Claims 30-48 are allowed.

Claims 24-28 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

Applicant's arguments, see page 8, filed 6 December 2006, with respect to the rejection of claims 30 and 31 under 35 U.S.C. have been fully considered and are persuasive. Therefore, the rejection has been withdrawn. However, upon further consideration, a new rejection is made in view of Hanes.

The examiner contends Hanes anticipates claim 49 since the structure does not include separately inserted sections or a magnetic coupler.

The examiner maintains Billingsley still anticipates claim 23. After the tool retrieves plunger 26, the entire assembly is considered to function as a plunger when tripped out and thus meets the limitations of claim 23.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Matthew J. Smith whose telephone number is 571-272-7034. The examiner can normally be reached on T-F, 8-3.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Lanna Mai can be reached on 571-272-6867. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
